

Need Chemical Safety Experts For Hazardous Materials Storage and Handling?

CECON provides individuals and teams of industry-experienced consultants who understand the potential dangers and regulatory requirements in your chemical facility.

Typical Deliverables

- Chemical storage and inventory management recommendations
- Assistance in writing/ upgrading chemical lab SOPs
- Process Safety Management (PSM)
- Forensics/ accident reconstruction
- Mock regulatory inspections (chemical, biochemical, pharmaceutical)
- Harmonizing standard operating procedures (SOPs) among multiple sites
- Recommended internal test procedures
- Industrial Hygiene (IH) and regulatory compliance assessments
- Content development and training
- Post-inspection strategic and tactical directives implementation

CECON Advantages

- **Chemicals expertise.** CECON was founded in 1985 by DuPont chemists and chemical engineers and has more than 600 Ph.D.'s in its network.
- **Quickly deploy large teams.** CECON has EH&S consultants with academic and commercial lab experience.
- **Experienced staff can find you the right consultant.** Each staff member has over 25 years of chemical industry experience.

Recent Projects

TSCA & EPA Compliance – Conducted an audit for a mixed metal oxides manufacturing facility.

Hospital Lab – Developed laboratory safety procedures for handling hazardous materials.

Compliance – Evaluated an OSHA Ruling in a chemical manufacturing plant.

SOPs and Training – Provided a validation plan for a medical tissue donation new processing facility.

Safety and Quality Control – Supported management staff for Federal military construction projects.
